

WATER WELL INSPECTION SERVICES

Let HGS assist with all of your water well inspection needs. HGS will help your clients ensure that their future water supply source is in a dependable working condition. Our licensed technicians will thoroughly inspect the current condition of well system components, test the water quality and determine flow/yield of the well. Further, HGS can not only recommend repairs, but in many instances resolve any needed repairs that may be necessary as the result of the inspection. HGS has over 30 years of water well experience and has been a license well driller providing both new construction and repair and maintenance service since 1999 throughout the State of New Mexico.

Typical System layout. System Layouts vary from sit to site.
